Dear Chair DeLauro and Ranking Member Granger:

I am requesting funding for the construction of a classroom and simulation laboratory in fiscal year 2023. The entity to receive funding for this project is the Central Vermont Medical Center (CVMC), located at 1311 Barre-Montpelier Rd., Berlin, VT 05602.

$735,560 in congressional support is needed to construct a second classroom and simulation laboratory at the CVMC. These facilities will expand the CVMC’s ability to not only offer its current nursing-specific programming, but also expand into the areas of laboratory science and radiology. The budget is derived from the project build for the first classroom and simulation laboratory in 2020, and accounts for current increases in inflation in both the materials and technology industry. The budget includes funding for design fees, construction, furnishings, fixtures, and equipment, laboratory/radiology equipment, and IT/telecommunications equipment. This project does not have any other committed funds.

I certify that neither I nor my immediate family has any financial interest in this project.

Sincerely,

[Signature]

Peter Welch
Member of Congress
